

CTS Only Provides **ONE** Solution: The One That's Right for Your Business

Industry-leading capabilities

DESIGN

The **CTS** Design Center delivers the most accurate RF modeling in the industry with the fastest industry turnaround using a vendor-agnostic approach to create custom designs.

BUILD

CTS delivers best-in-class networks using our nationwide team of certified technicians, transparent operational model, and our commitment to **C**ustomer **T**otal **S**atisfaction.

RUN

Leveraging 20 years of service, **CTS** provides routine maintenance, repair and dispatch services, and outsourced network operations of high-availability managed services.

SUPPORT

The **CTS** Network Operations Center operates 24x7x365 by a team of network engineers using advanced AI-based tools to proactively monitor and optimize customer networks.

Custom in-building and campus connectivity solutions

PRIVATE CELLULAR NETWORKS

CTS designs, implements and operates private cellular networks with proven LTE and 5G technologies for mission-critical enterprise applications.

CELLULAR DISTRIBUTED ANTENNA SYSTEMS AND SMALL CELLS

CTS has been improving in-building wireless performance since 2004, having designed and deployed over 12,000 Distributed Antenna System (DAS) and small cell networks.

PUBLIC SAFETY DAS

CTS designs and builds public safety DAS networks to meet the most stringent requirements and ensure regulatory compliance for first responder communications.

WI-FI

CTS designs, engineers and deploys custom wireless LAN solutions for enterprise, stadium, healthcare and municipal Wi-Fi networks.

SOFTWARE-DEFINED-LAN

CTS designs, builds and supports a fiber-deep SD-LAN infrastructure that integrates building systems and secure applications into a single, converged, managed platform.

FORTE® NEUTRAL SOURCE

CTS Forté® Neutral Source is a turnkey solution that supplies any combination of AT&T, Verizon or T-Mobile cellular signal for virtually any DAS deployment.
